

# Brief Table of Contents

<i>Brief Table of Contents</i> .....	<i>A</i>
<i>Preface</i> .....	<i>I</i>
<i>TOC for case studies</i> .....	<i>i</i>
<b>1 Software Process</b> .....	<b>1</b>
1.1 The nature of software development.....	1
1.2 System planning .....	10
1.3 Systems for three management levels .....	17
1.4 Software development lifecycle.....	18
1.5 Problem statements for case studies.....	37
<b>2 Requirements Determination</b> .....	<b>50</b>
2.1 Functional and nonfunctional requirements .....	50
2.2 Requirements elicitation.....	52
2.3 Requirements negotiation and validation .....	61
2.4 Requirements management.....	63
2.5 Requirements business model.....	66
2.6 Requirements document.....	74
<b>3 Objects and Object Modeling</b> .....	<b>88</b>
3.1 Fundamentals of object technology .....	88
3.2 Fundamentals of object modeling.....	118
<b>4 Requirements Specification</b> .....	<b>163</b>
4.1 Architectural prerogatives .....	163
4.2 State specifications .....	167
4.3 Behavior specifications .....	197
4.4 State change specifications .....	212
<b>5 Moving from Analysis to Design</b> .....	<b>232</b>
5.1 Advanced class modeling.....	232

5.2	Advanced generalization and inheritance modeling.....	249
5.3	Advanced aggregation and delegation modeling.....	259
6	<i>System Architecture and Program Design</i> .....	281
6.1	Distributed physical architecture .....	282
6.2	Multi-layer logical architecture .....	286
6.3	Architectural modeling.....	289
6.4	Principles of program design and reuse.....	296
6.5	Behavioral and structural collaboration.....	307
7	<i>User Interface Design</i> .....	330
7.1	From UI prototype to implementation.....	331
7.2	Guidelines for UI design.....	334
7.3	UI containers and components .....	337
7.4	Web UI design .....	351
7.5	Window navigation .....	352
8	<i>Persistence and Database Design</i> .....	374
8.1	Business objects and persistence.....	375
8.2	Relational database model .....	378
8.3	Object-relational mapping .....	389
8.4	Patterns for managing persistent objects.....	396
8.5	Implementing database access .....	401
8.6	Designing business transactions.....	403
9	<i>Testing and Change Management</i> .....	421
9.1	Test concepts .....	421
9.2	Test techniques .....	425
9.3	Test driven development .....	431
9.4	Managing change .....	432
9.5	Traceability.....	436
10	<i>Tutorial-style Review and Reinforcement</i> .....	449
10.1	Use case modeling .....	450
10.2	Activity modeling .....	455
10.3	Class modeling.....	457
10.4	Interaction modeling.....	464
10.5	Statechart modeling .....	470
10.6	Implementation models .....	472
10.7	Object collaboration design .....	479

<b>10.8</b>	<b>Window navigation design .....</b>	<b>489</b>
<b>10.9</b>	<b>Database design.....</b>	<b>492</b>
	<b><i>Bibliography.....</i></b>	<b><i>500</i></b>
